

Spectrum 2017

Conference Introduction

George Kizer

NSMA Objectives

The National Spectrum Managers Association [NSMA] is a voluntary organization of individuals whose interests span telecommunications system design and engineering, interference analysis and control, radio frequency coordination, and licensing for radio systems operating in the radio frequency spectrum.

NSMA Objectives

The NSMA provides a forum for subject matter experts to discuss and resolve technical and/or procedural issues of common interest, with the objectives of ensuring appropriate control of radio interference and making the radio system engineering and licensing process as efficient and effective as possible.

NSMA Objectives

Develop technical and procedural recommendations for coordination of wireless telecommunications systems and services

Provide a linkage between government regulations and industry practice by developing recommendations that streamline and standardize procedures used by the frequency coordination community.

Proactively advise regulatory bodies on matters affecting radio frequency spectrum policy pertaining to terrestrial microwave, satellite and emerging technology radio services

Management Team

Officers

President: George Kizer	TeleVision
Vice-President: Joe Sandri	Fiber Tower
Treasurer: David Popkin	Verizon (retired)
Secretary: Brad Youngblood	Micronet Communications

Directors

Colin Alberts	Freedom Technologies, Inc.
Beau Backus	The Aerospace Corporation
Andrew Clegg	Google
Mike Mead	Mike Mead Consulting
David Meyer	Comsearch
Patrick Picquet	Nokia
Ken Ryan	Skjei Telecom
Vicki Schultheis	Centurylink
Larry Sutliff (Study Gp 3)	AT&T Mobility
Tom Willis III	AT&T Labs
Jim Wolfson (Web master)	X-DOT

Spectrum 2017

**Annually we meet in Washington DC to
renew acquaintances and discuss topics
of mutual interest.**

Spectrum 2017

**Let's enjoy these two days as
we overview emerging concepts
in spectrum management**
